

Dear Subscribers,

It's been 8 long months since the first recorded death due to the Covid-19 pandemic. Since the first outbreak, nearly 28 million cases have been confirmed and nearly 1 million deaths have been recorded worldwide.

In two months from February to April 2020, the US market lost 39% of its value, crashing down from over 29,500 to below 18,200 (Dow Jones 30). In less than 6 months, the market has bounced back in a sort of V-shape recovery for an impressive +50% rally – this is less than 7% away from the all-time high.

Many sectors around the world have thrived during the pandemic, such as technology. Think of companies like Netflix, Google and especially Amazon. Amazon in particular has grown by more than 100% since the first Covid-19 death in January 2020.

Active traders love volatility yet most new traders have a difficult time understanding why said volatility is preferred and many experienced traders aren't able to explain this either. In trading, traders are looking to take as many high probability trades as possible, if the market is quiet, there are less opportunities, if the market is volatile, there are more opportunities – it's that simple.

If trade setups are more likely to be correct than incorrect, then this trader will see the month net positive as many more opportunities are presented. Note that professional traders fully expect to be incorrect on several trades but look to capture bigger gains on their winners.

The last two months have been incredibly busy for us:

July 2020: Launched weekly live trading webinars with an emphasis on Scalping

August 2020: Launched a premium and comprehensive MT4 platform course tailored for serious traders

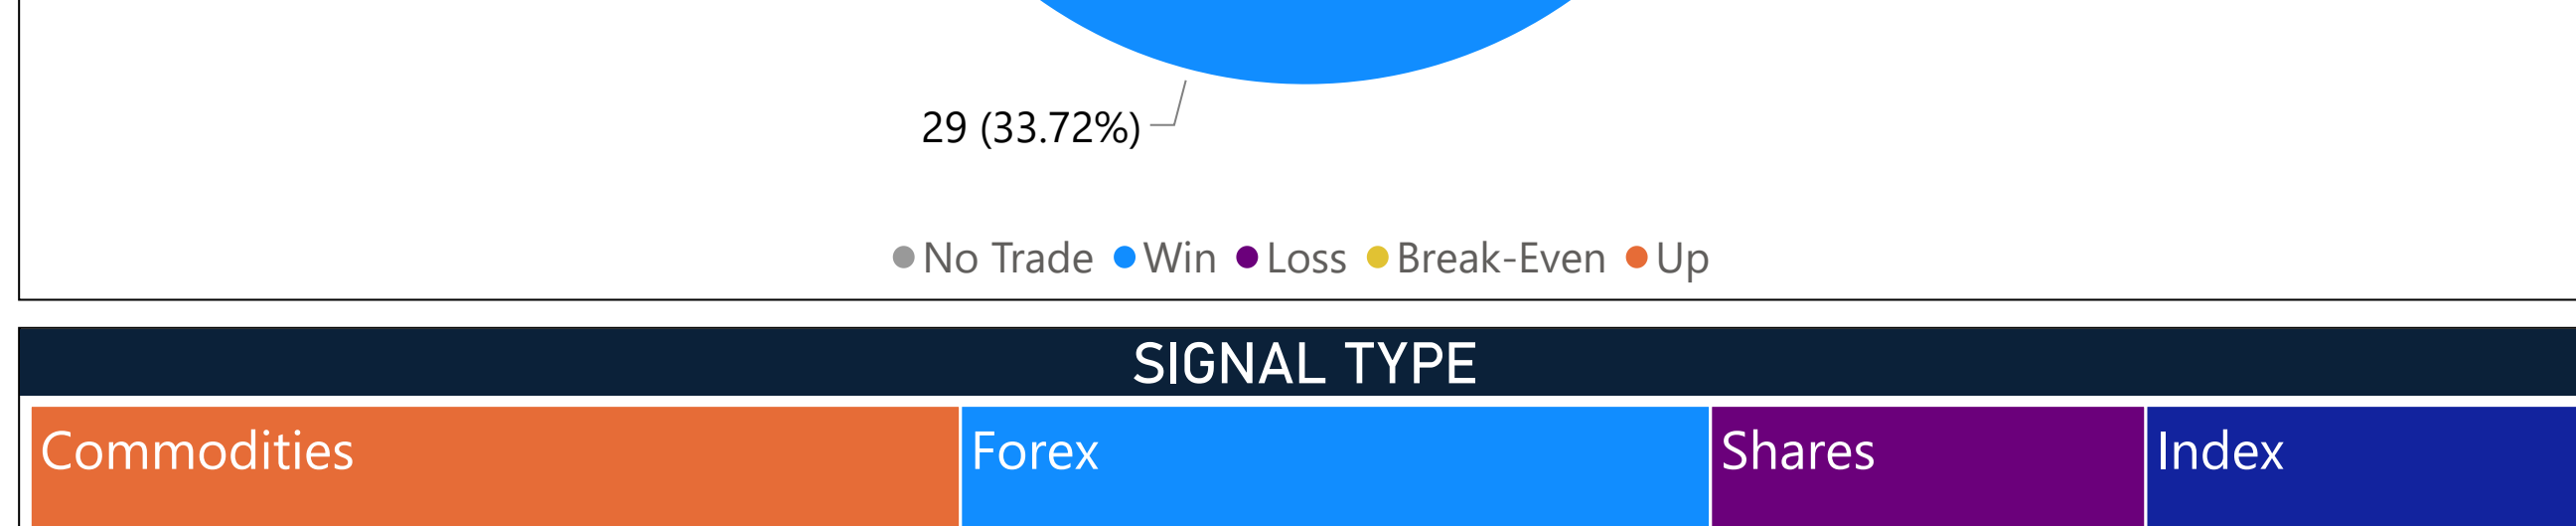

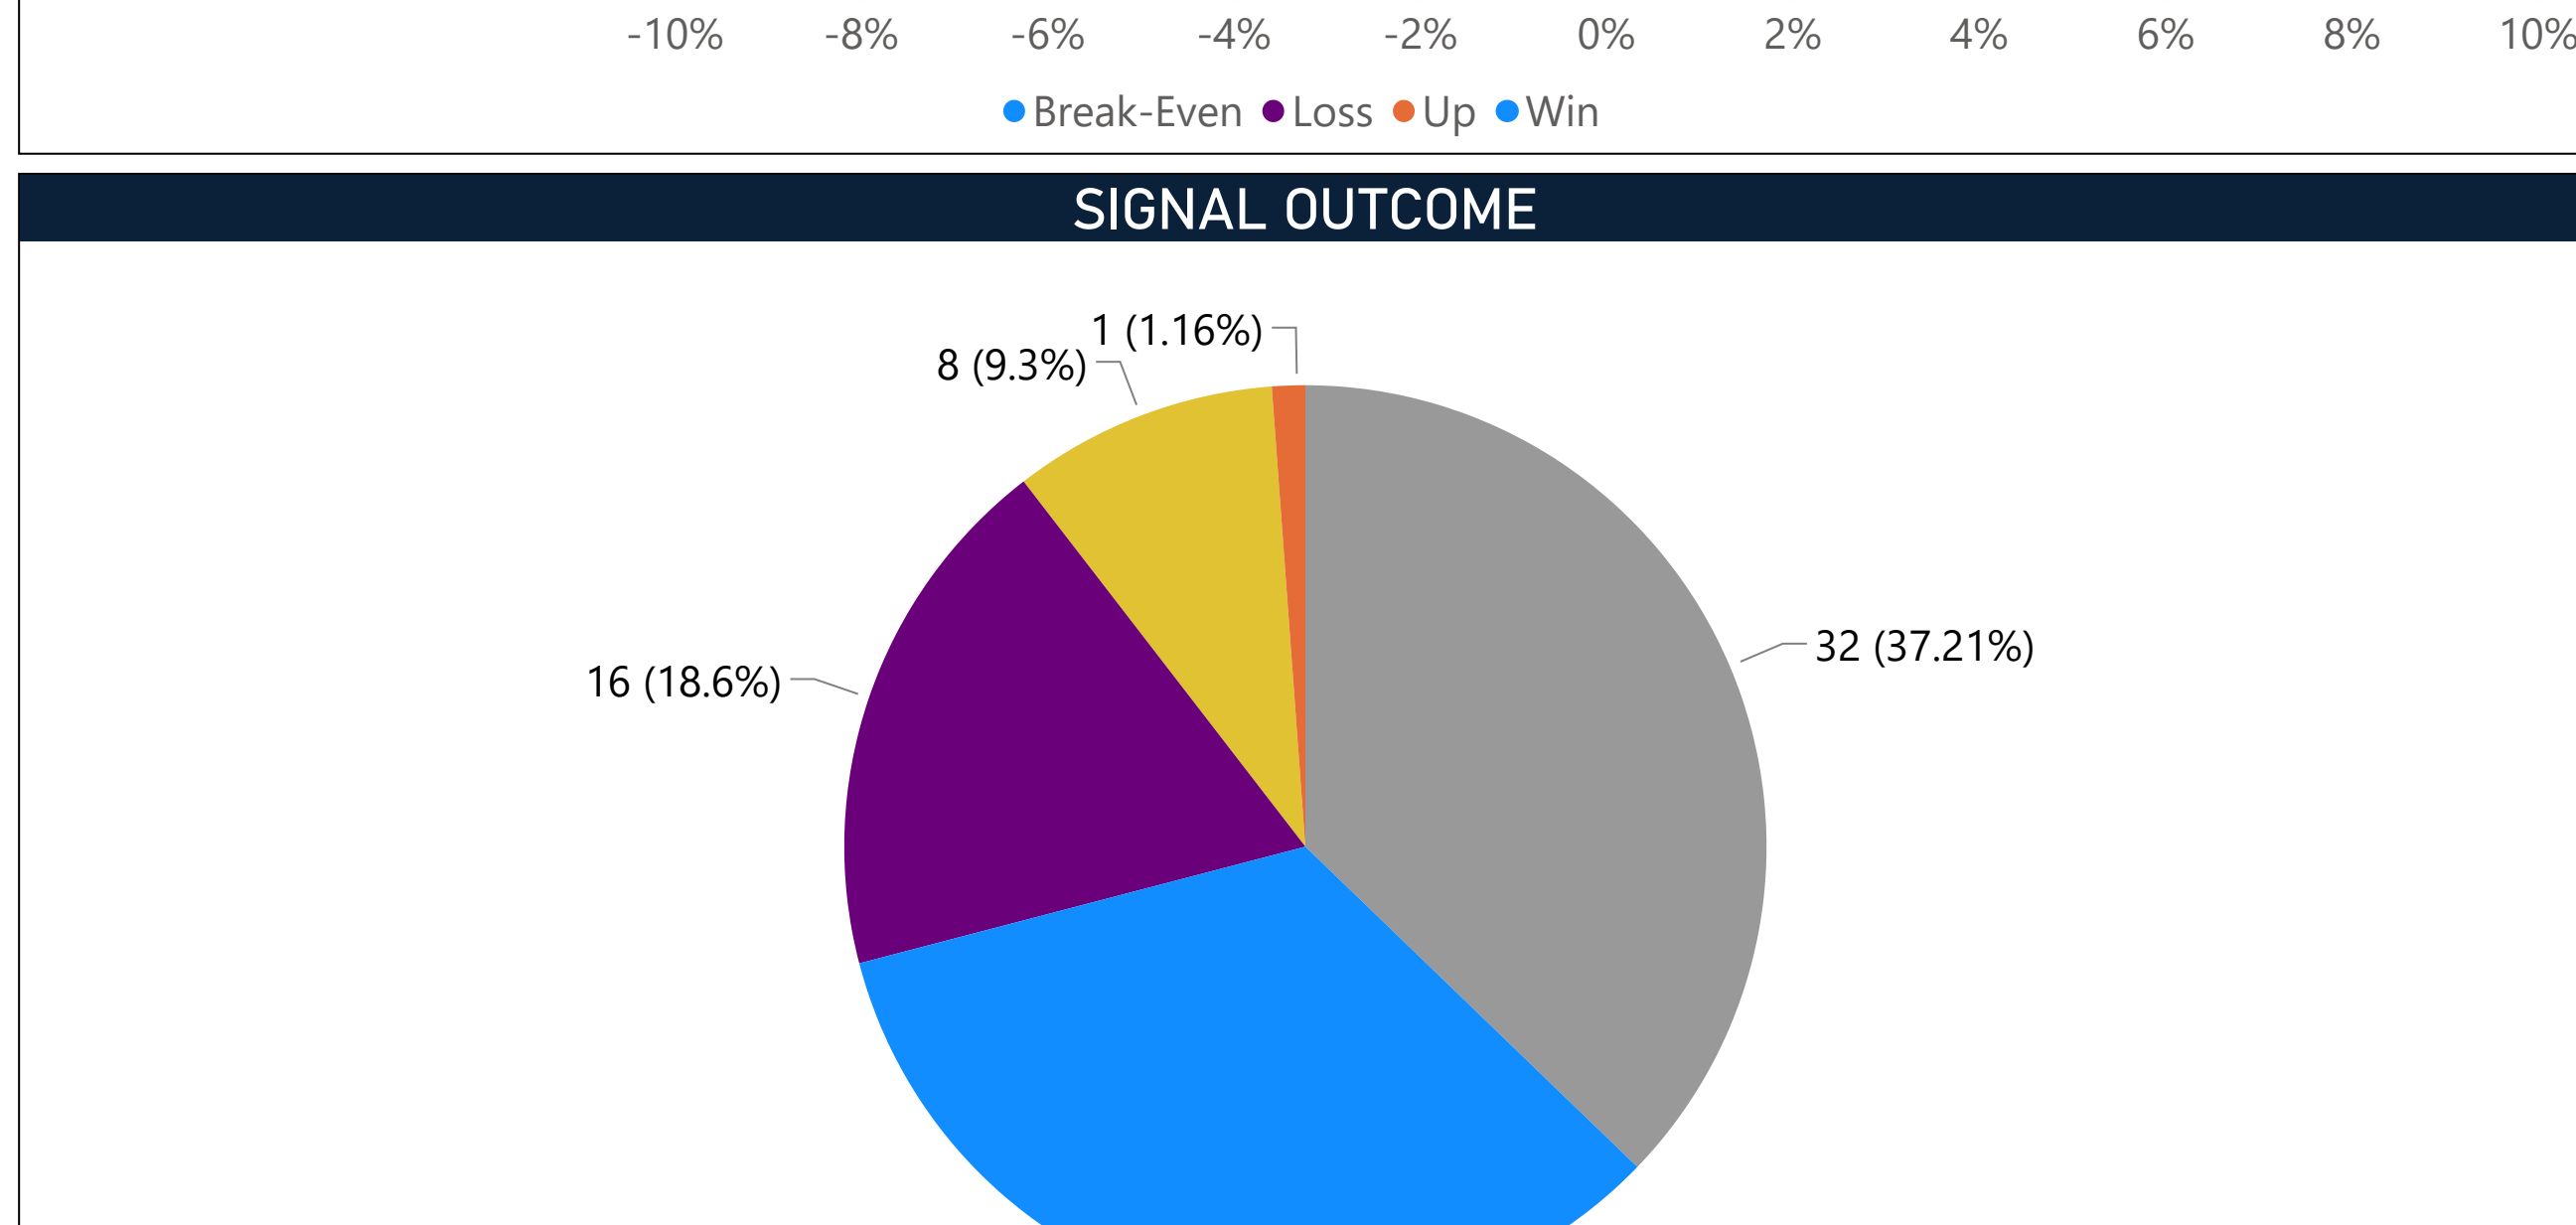

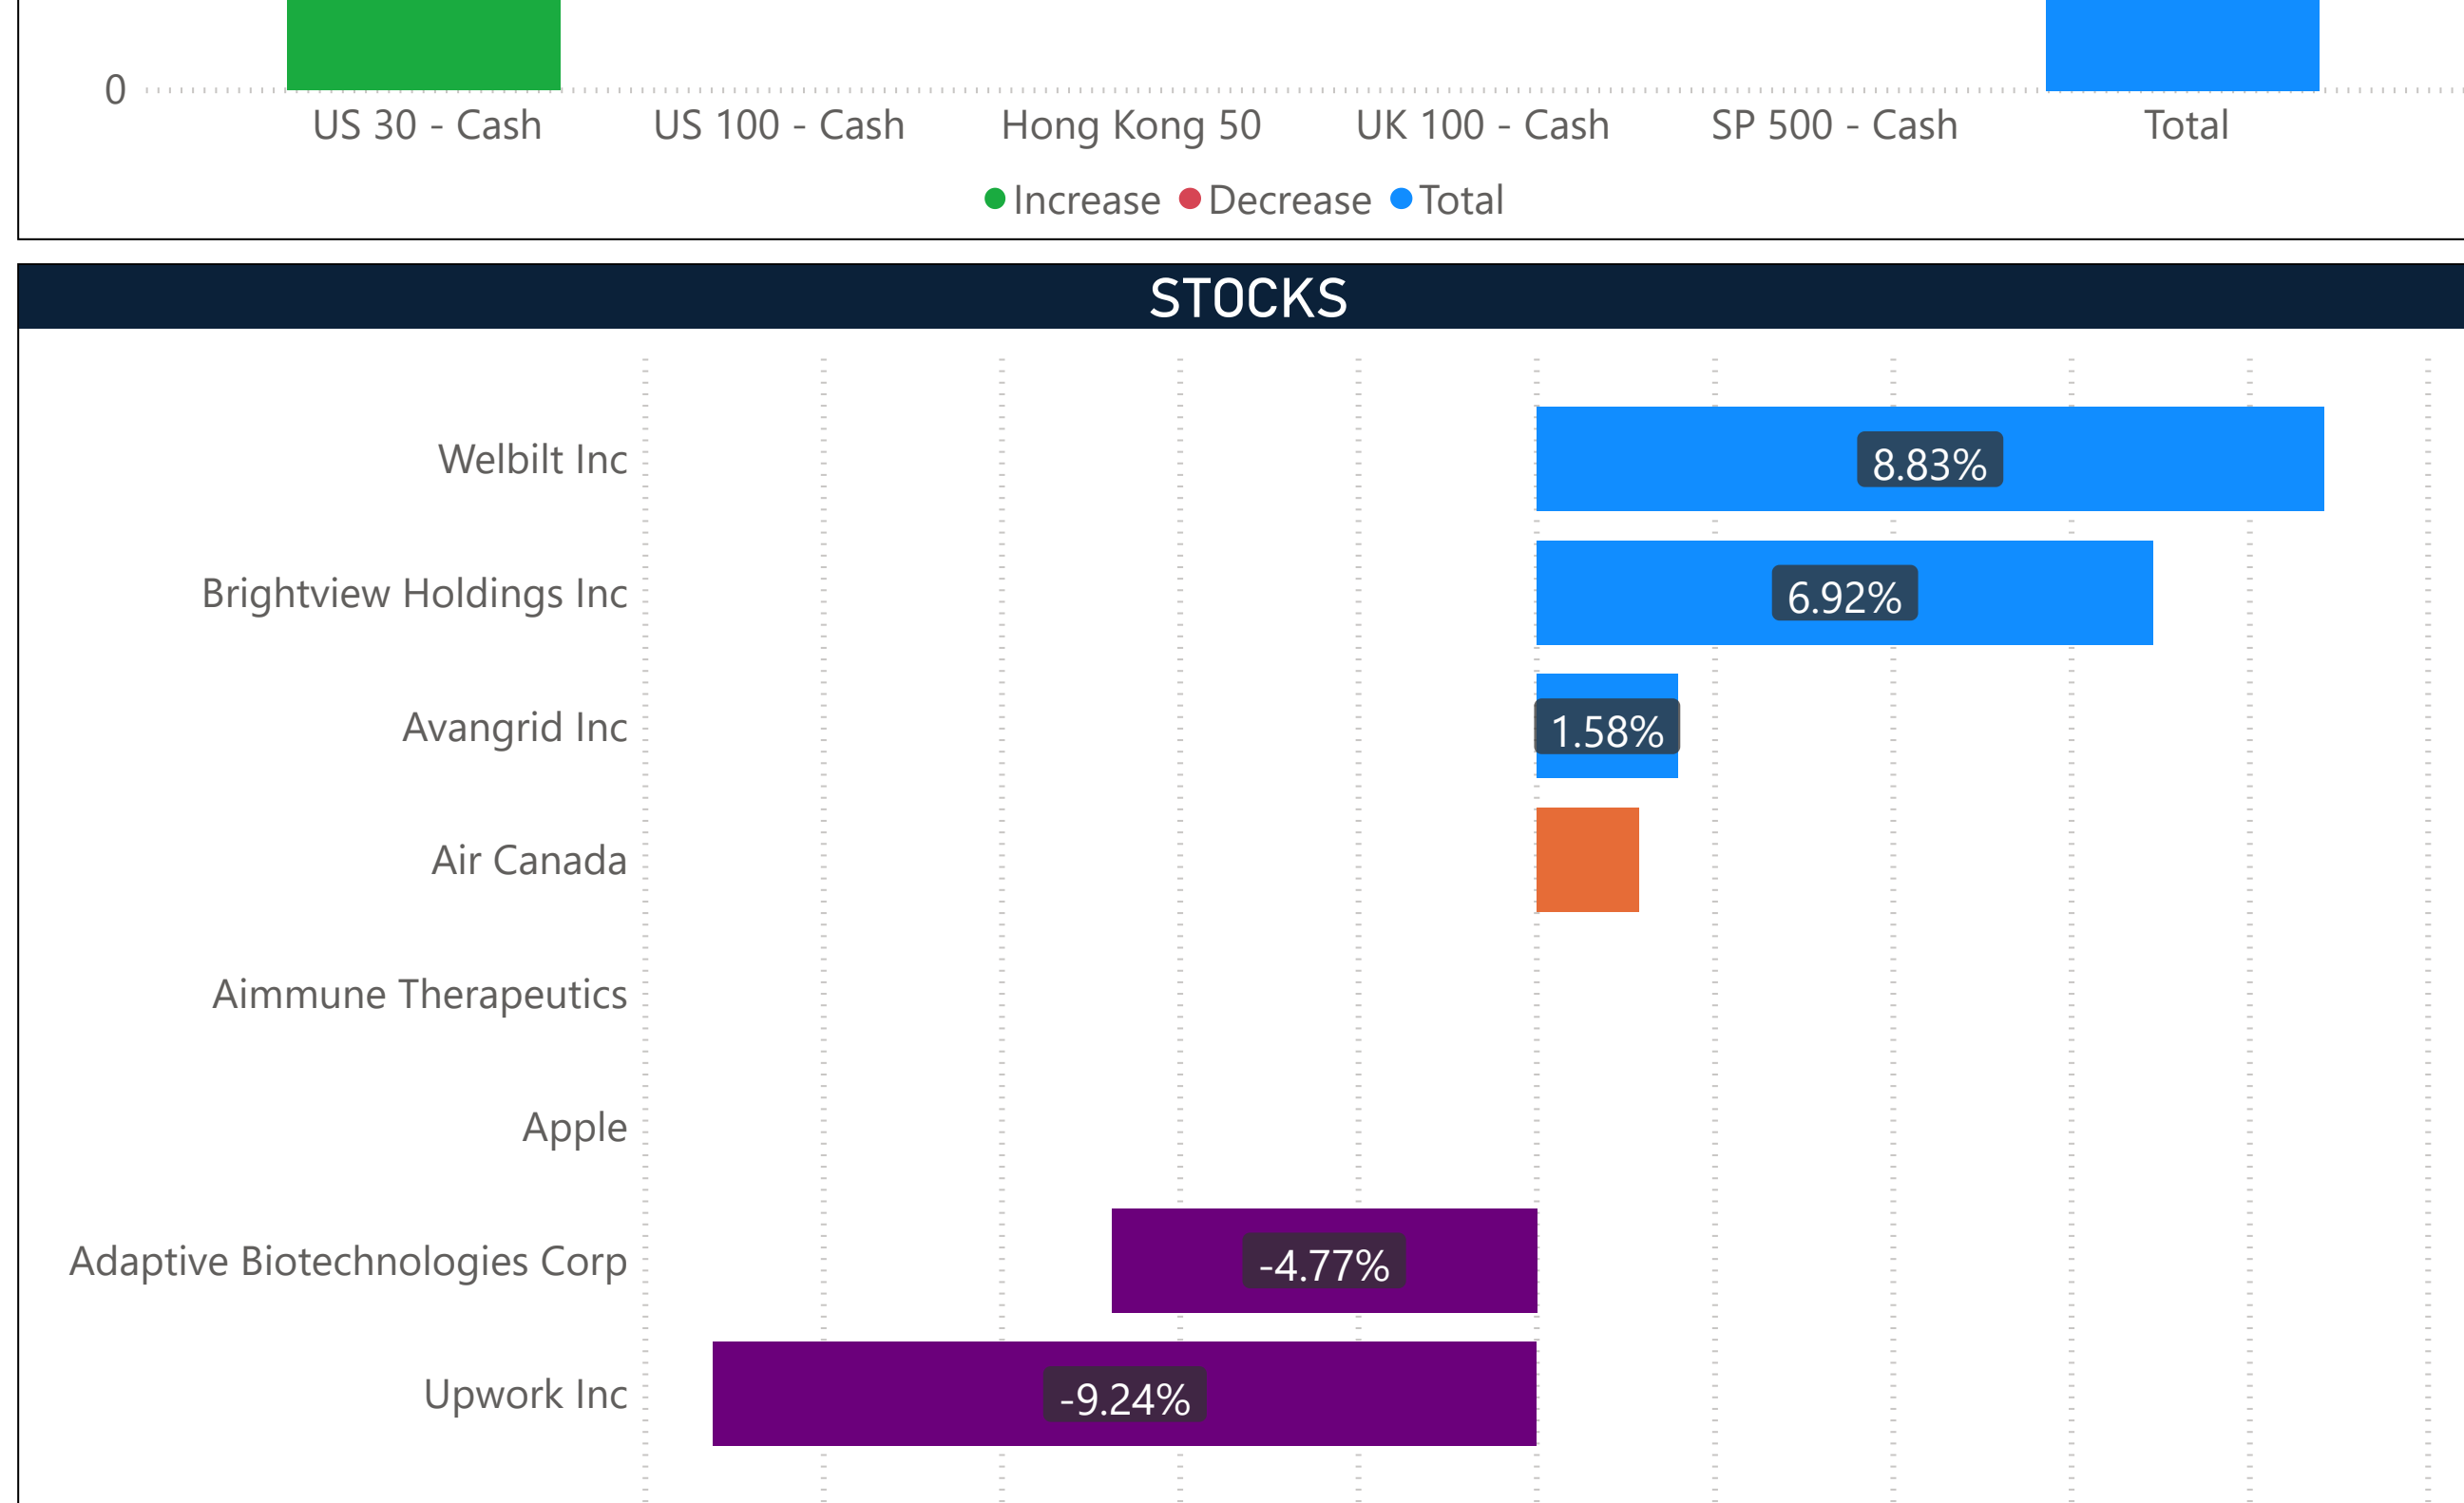

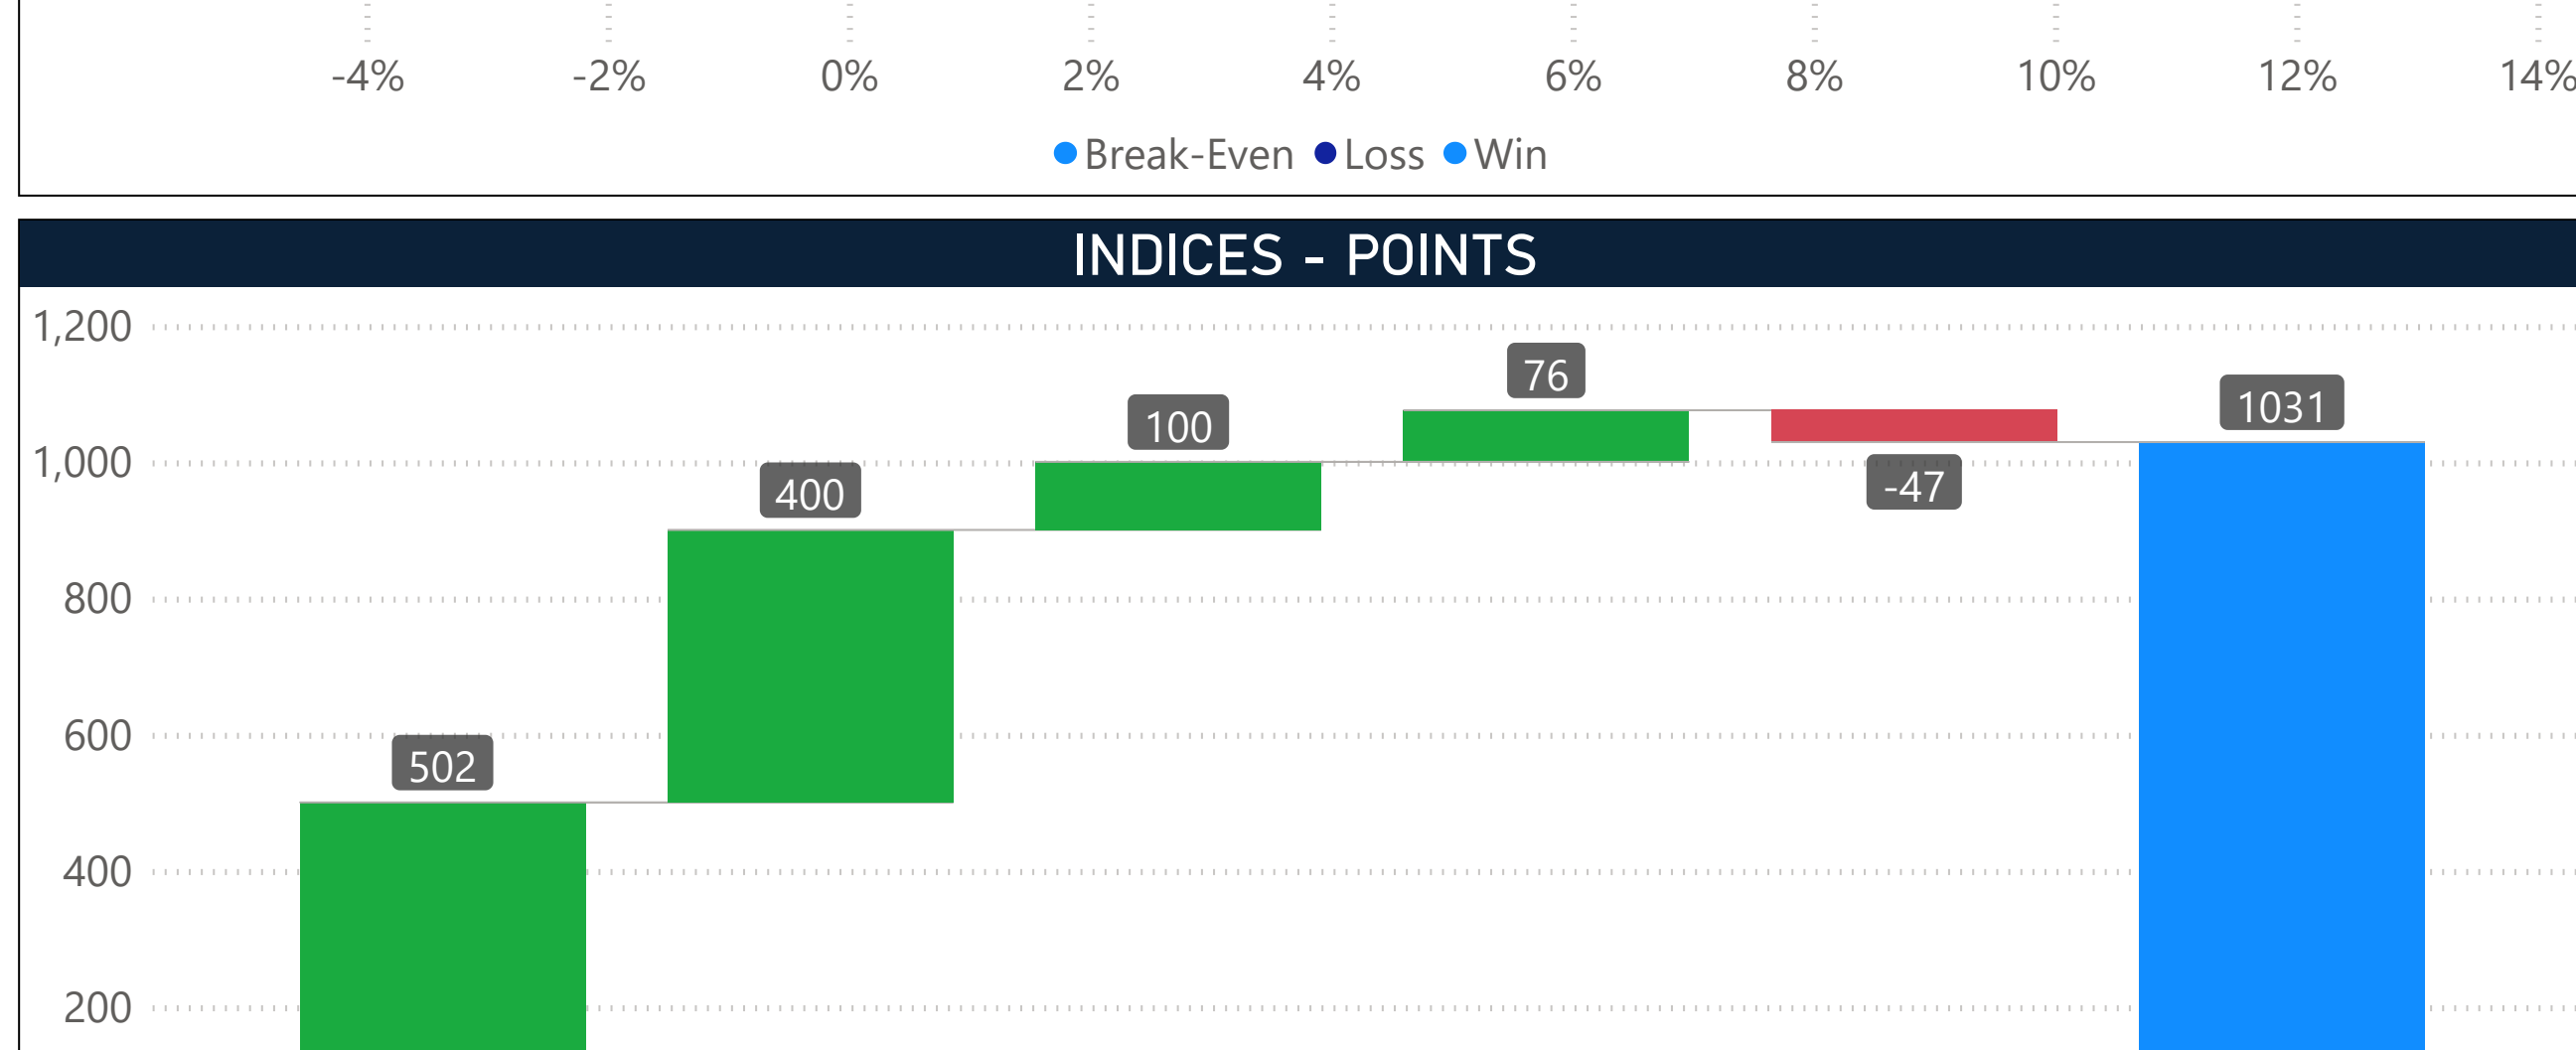

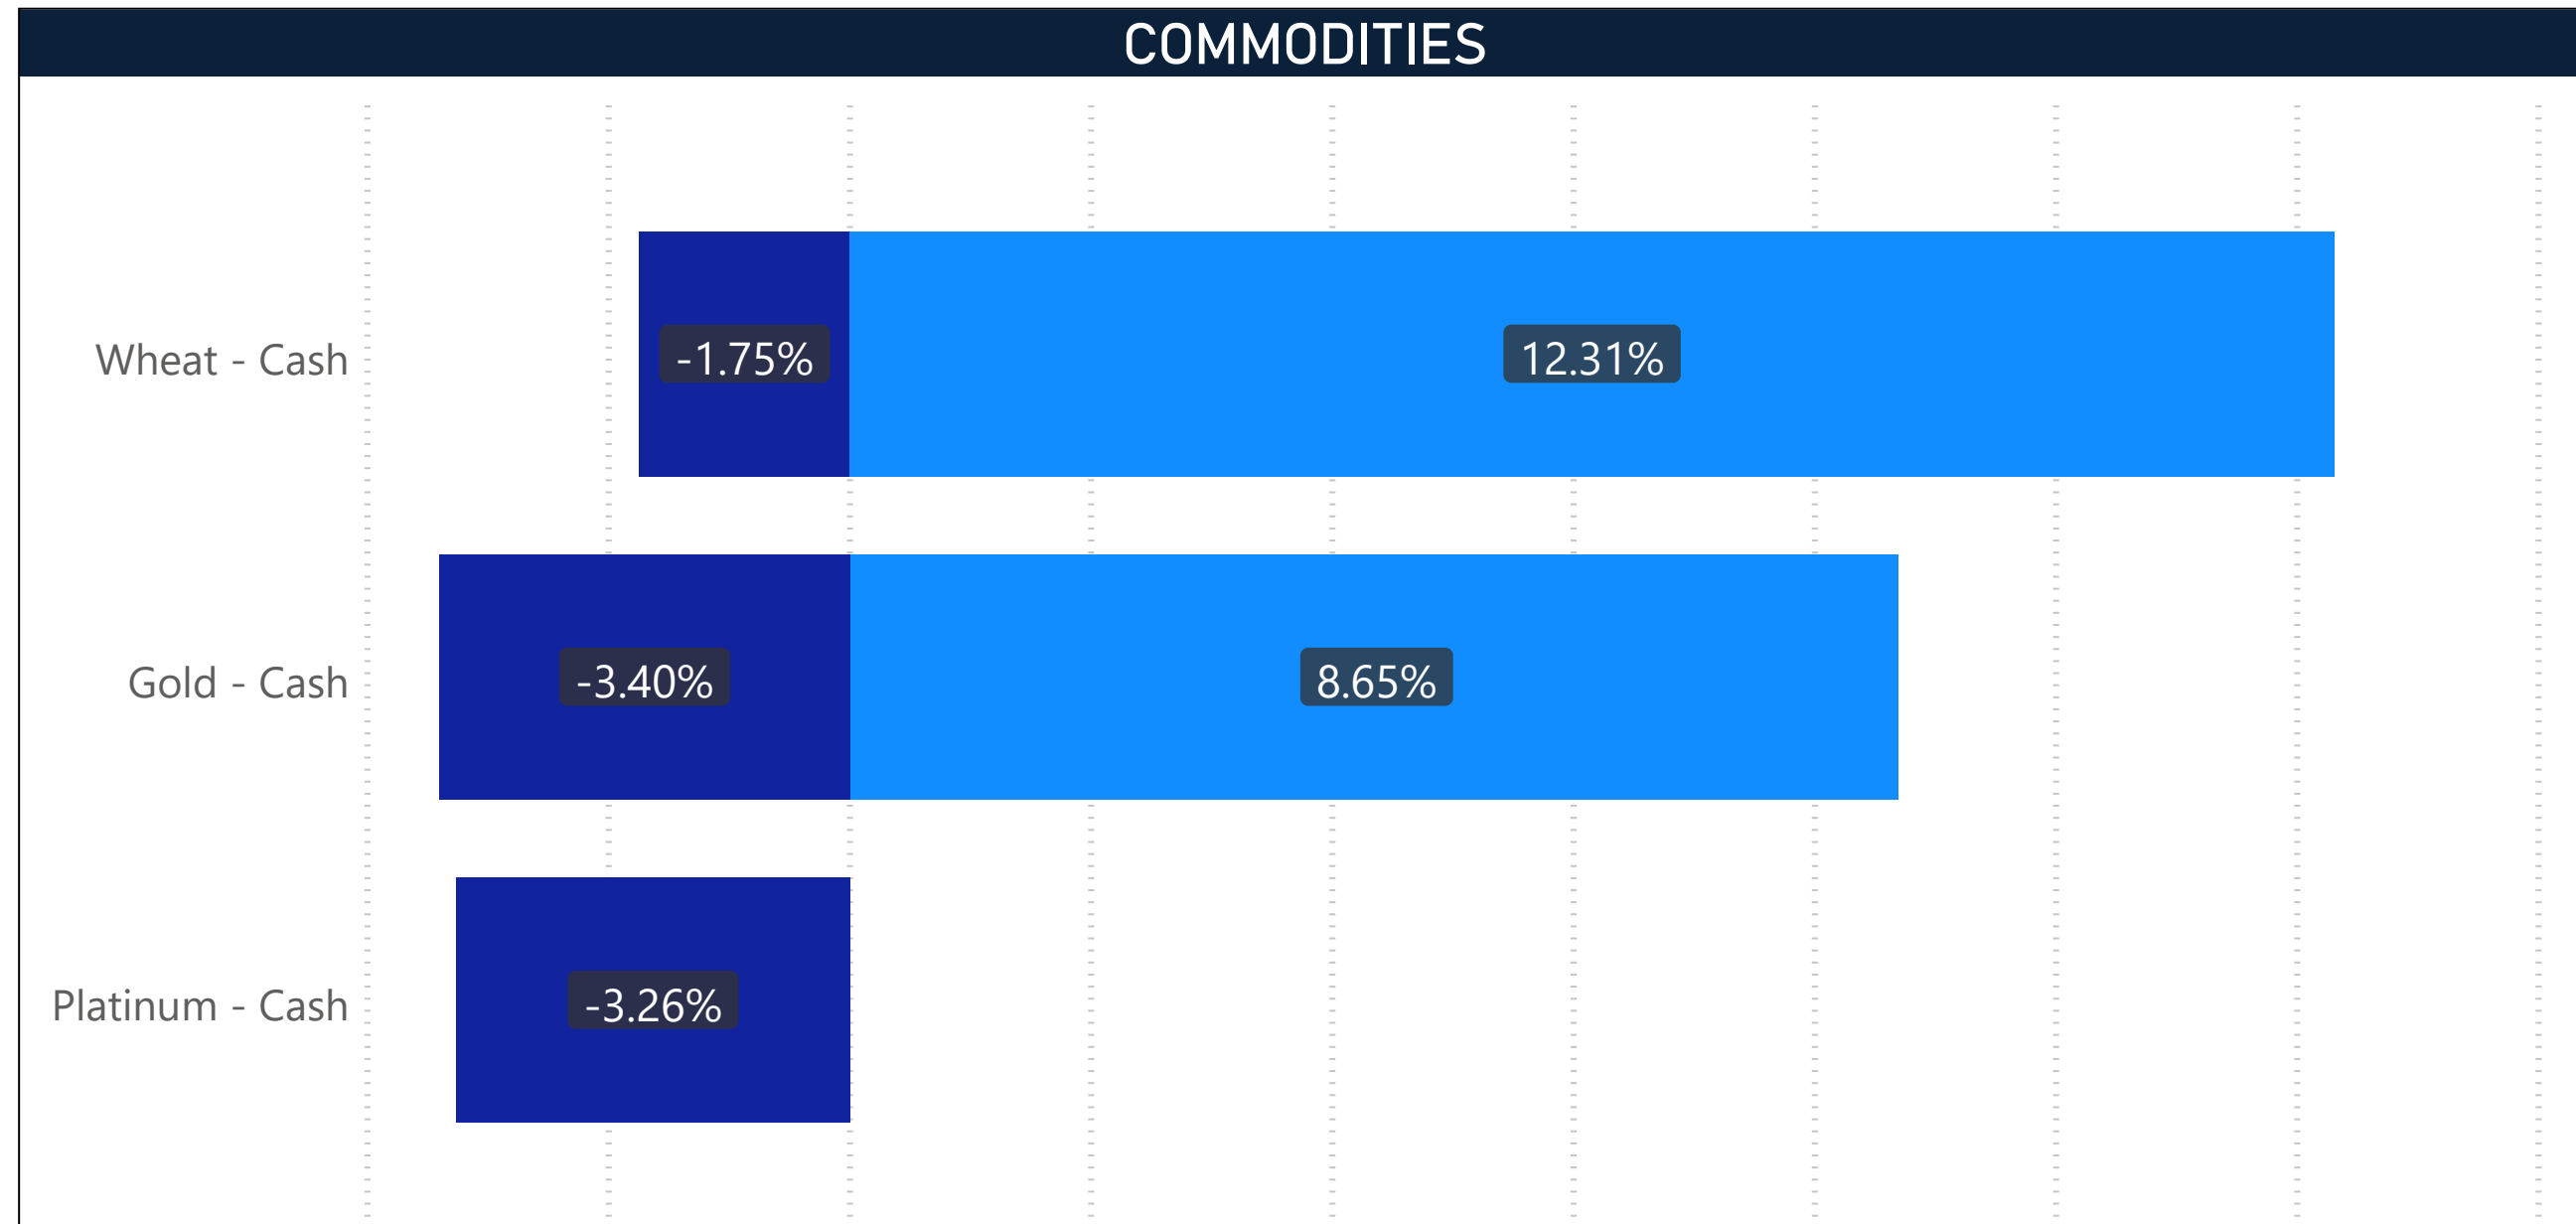

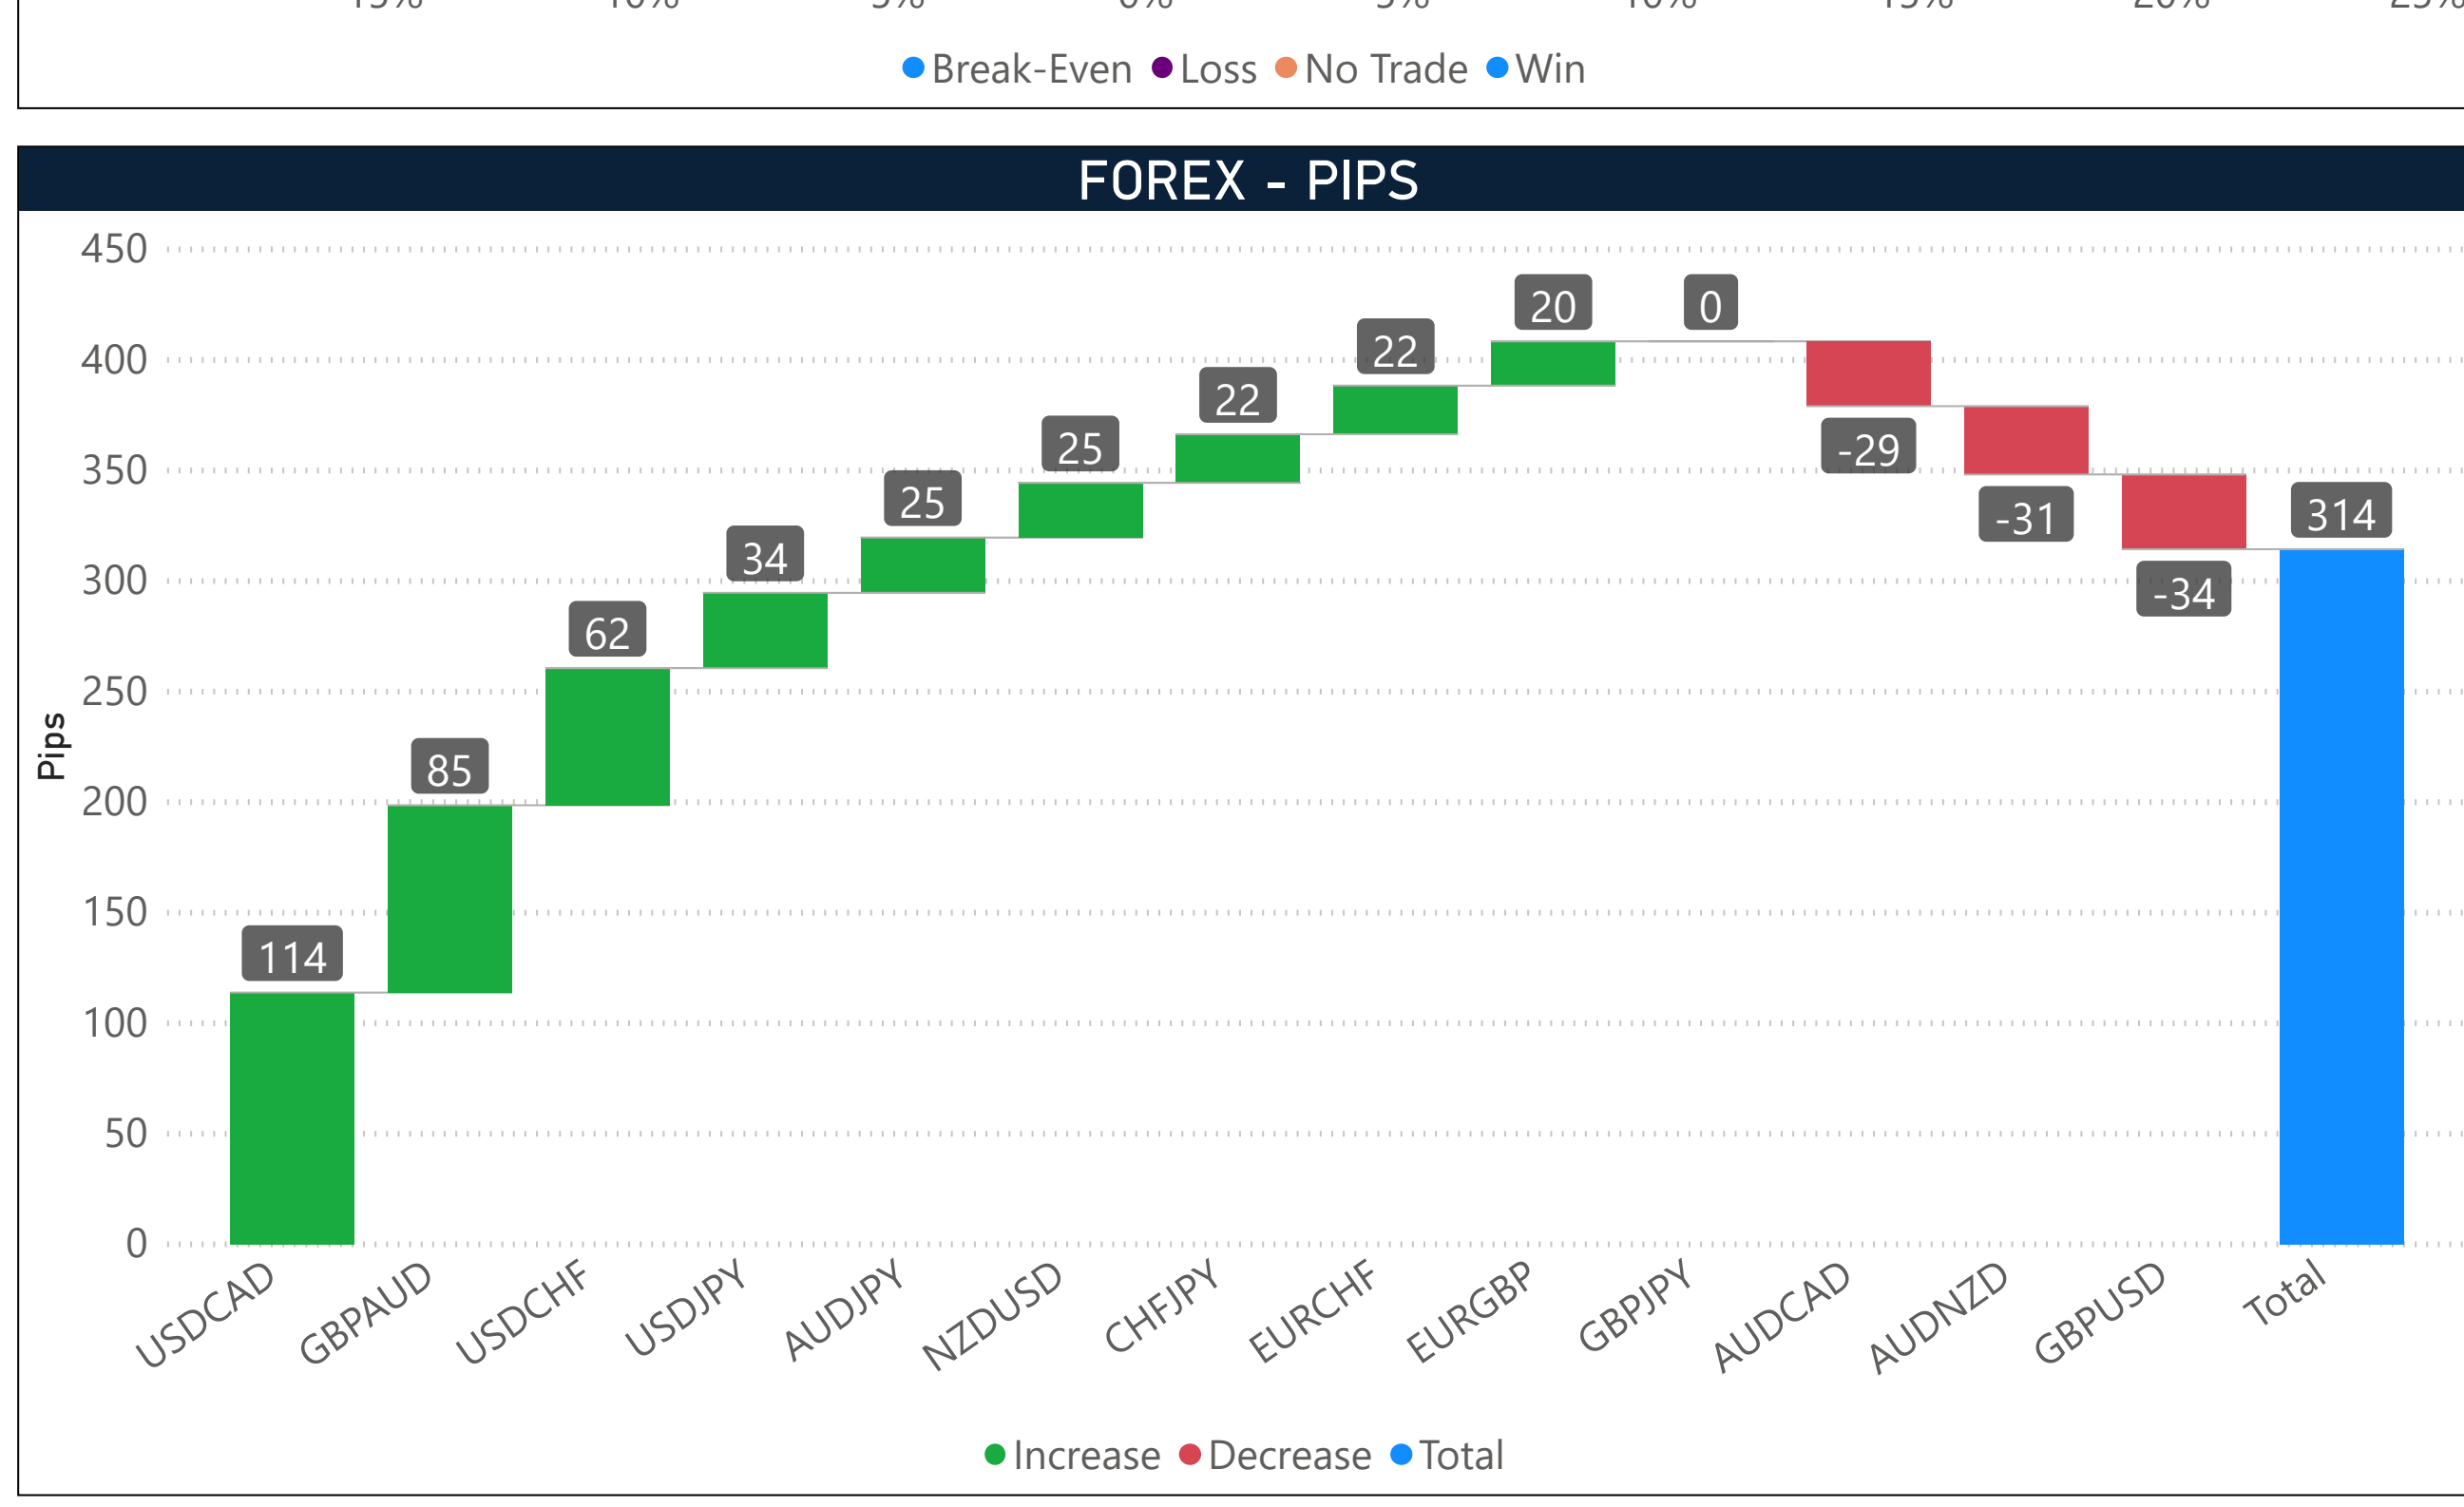

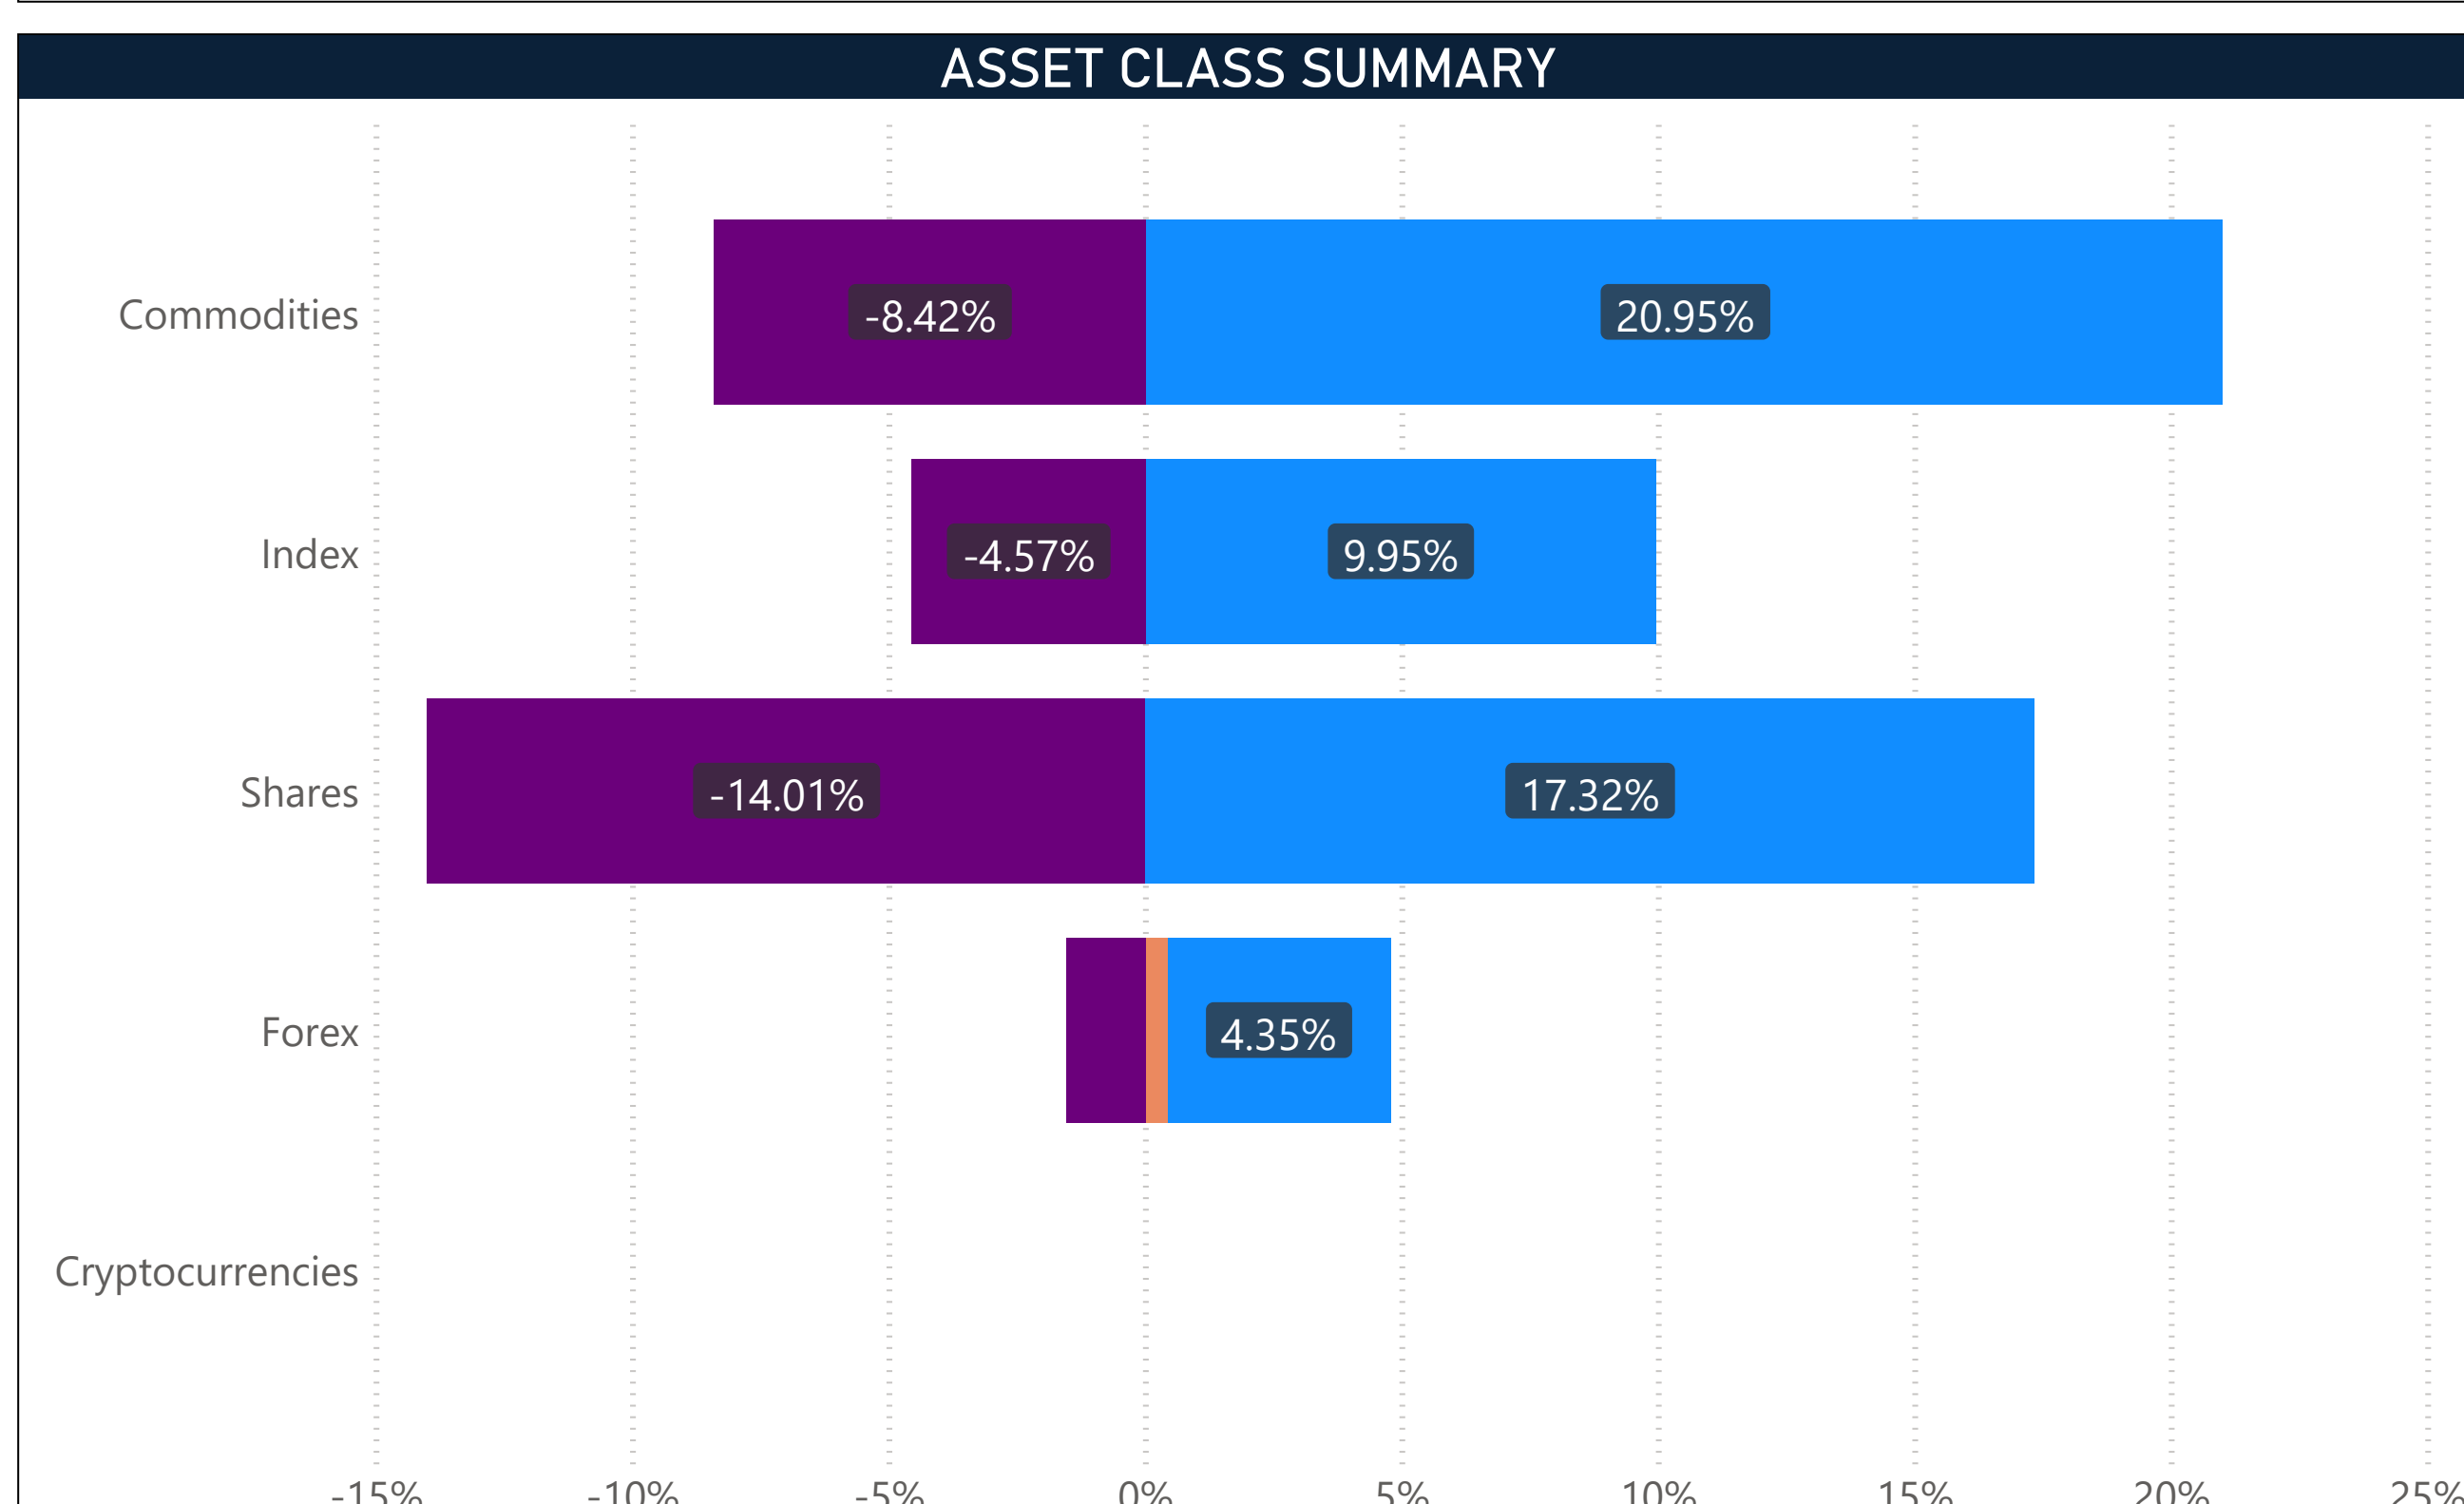

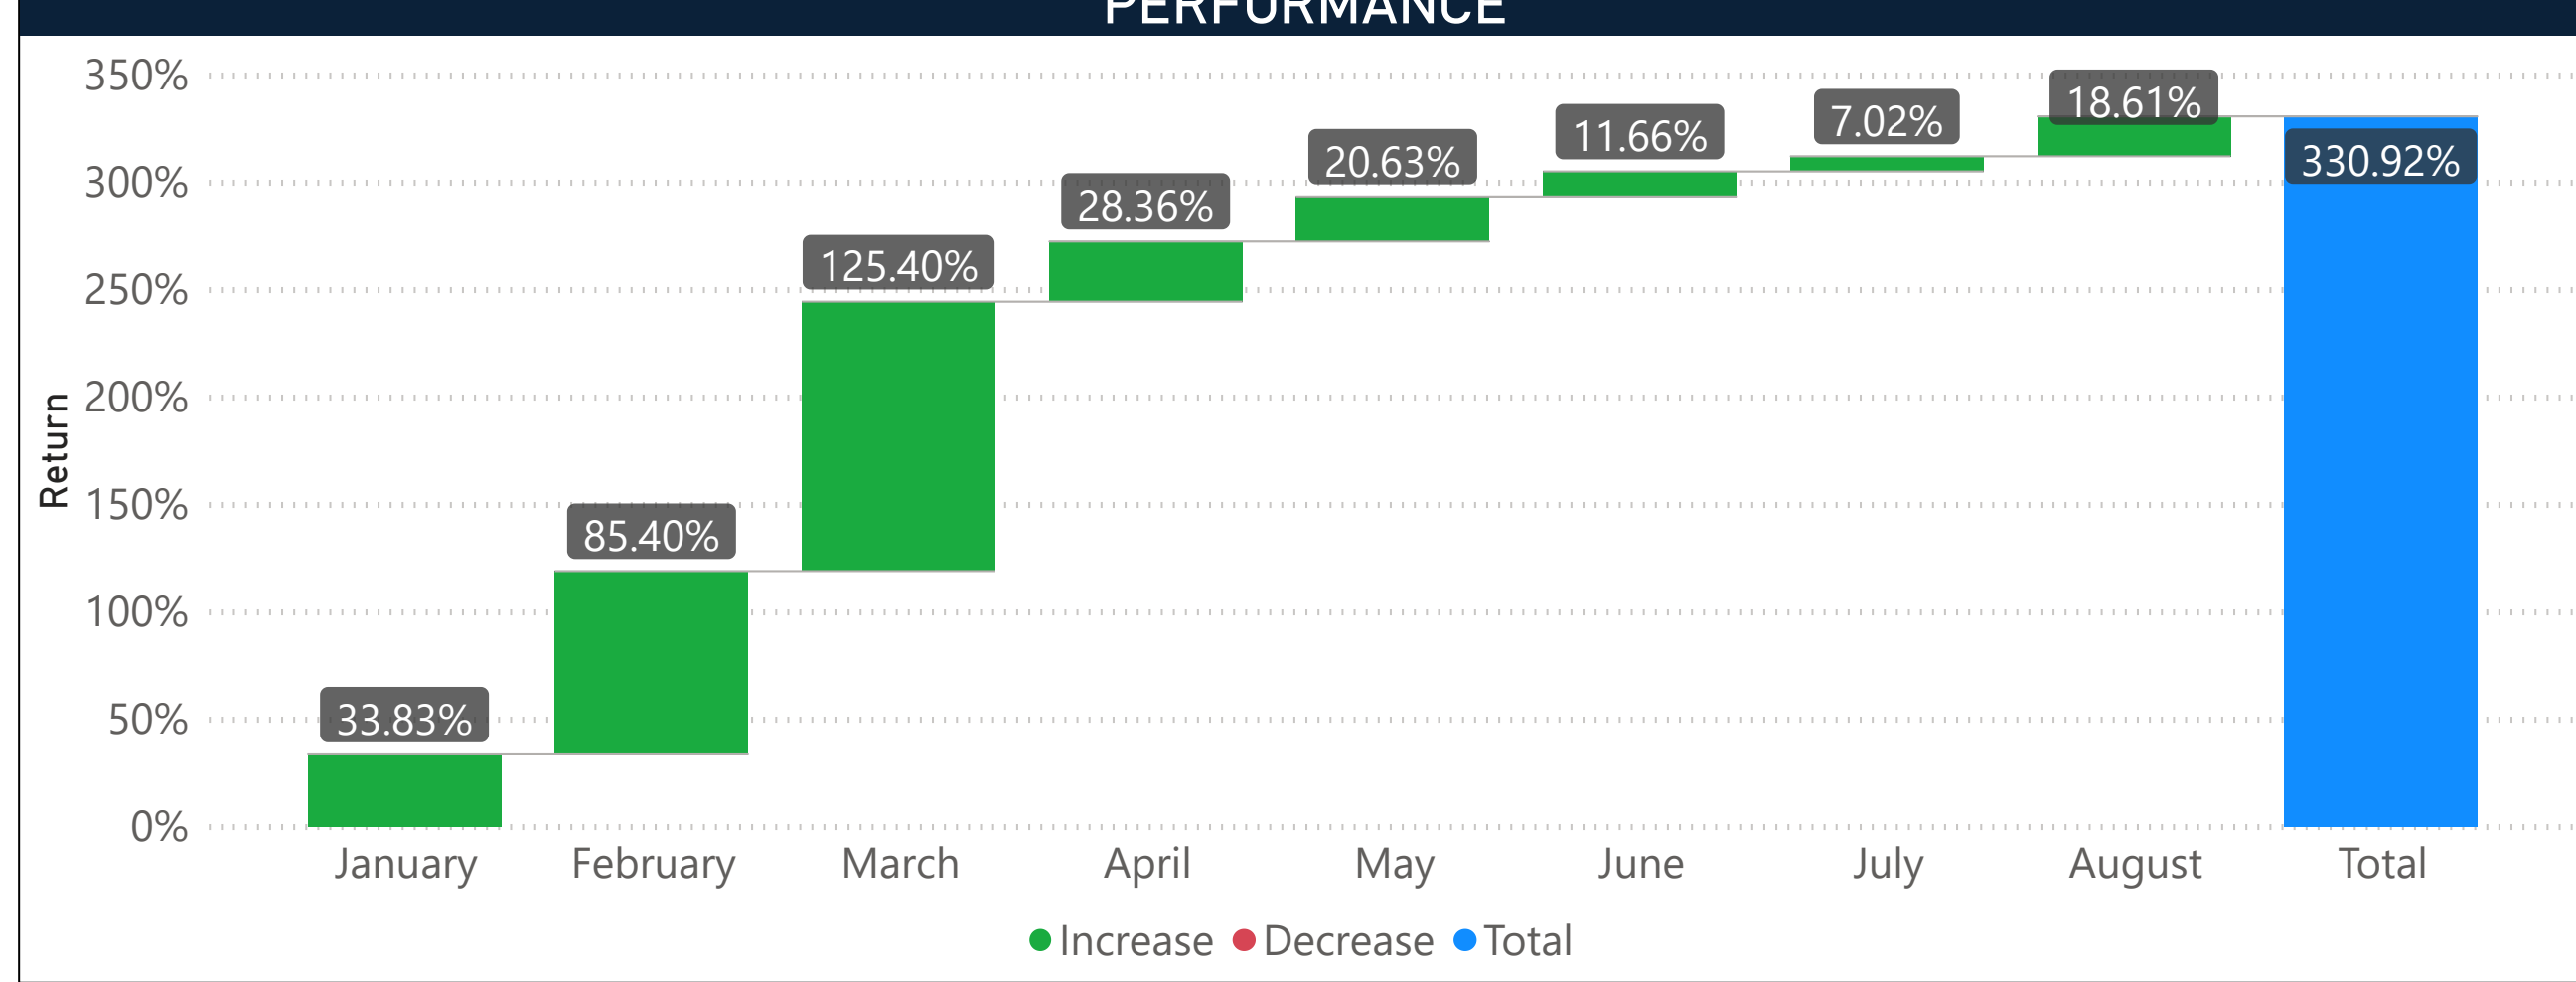

August 2020: Automated algorithmic signals for our Inner Circle Subscribers

Signal performance continues to be positive and we anticipate a great deal of volatility leading up to the US elections. The Covid-19 pandemic is far from over and civil tensions remain high between numerous groups.

Signals are but helpful guidelines to help you with your trading, in order to fully capitalize on market opportunities, we highly recommend enrolling in our Essentials trading course which will take your trading to a new level.

Sincerely,

Trade Doctors
